DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35
 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/828911, filed on 04/10/2001.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 52. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: the specification is not in a form customary to US practice. It is suggested that the substitute specification entered for the parent case be submitted for entry in the child case

Appropriate correction is required.

Claim Objections

4. Claim 27 is objected to because of the following informalities: claim 27 recites the terminology "whereby". It has been held that the functional "whereby" statement does not define any structure and accordingly cannot serve to distinguish. *In re Mason*, 114 USPQ 127, 44

Application/Control Number: 10/718,705 Page 3

Art Unit: 3644

CCPA 937. It is suggested the Applicant replace the functional "whereby" with the term - - wherein- -.

5. Claim 1 is objected to because of the following informalities: it is suggested the term "which" preceding "feed metering device" be replaced with - -said- - or - -the- - to better conform with US practice. Appropriate correction is required.

Claim Rejections - 35 USC § 102

- 6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
 - A person shall be entitled to a patent unless -
 - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Lanfranchi, US Patent 5,669,328.

Lanfranchi discloses a feed metering device provided with a feed unit for containing feed, an entrance opening (i.e. 22 when facing towards the animal) provided with a closing means (cover 20) that is movable across the entrance opening, characterized in that the closing means rotates about an axis, the closing means being driven by a roll (44) that contacts the closing means and the roll is driven by a motor (42).

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Application/Control Number: 10/718,705

Art Unit: 3644

Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claim 1 is rejected under the judicially created doctrine of double patenting over claim 1 of U. S. Patent No. 6651584 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: claim 1 of the issued patent is directed to the current invention. While claim 1 of the issued patent includes a limitation regarding the axis about which the device rotates, the current claim is still obvious over the patented claim as no axis of rotation has been claimed and therefore the horizontal axis of rotation is readable upon the pending claim.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Application/Control Number: 10/718,705 Page 5

Art Unit: 3644

Allowable Subject Matter

10. Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. van den Berg (US 6,371,047), Lewis (US 6,349,671), Matsuura (US 6,044,795), Targa (US 5,570,655), Phillippi (US 5,377,620), Kirk (US 5,150,664), Pourshalchi (US 4,934,317), Zammarano (US 4,617,874), Carroll (US 4,475,481), Crawford (US 3,826,231).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly S Smith whose telephone number is 703-308-8515. The examiner can normally be reached on Monday thru Friday 10:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles T Jordan can be reached on 703-306-4159. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
